I found out about the program through...

...Former colleague and fellow at LGT VP

My Fellowship role:

Investment Associate Fellow for SIRA (Nurturing Care Collective)

Fellowship organization: LGT Venture Philanthropy - India

Organization's mission: LGT Venture Philanthropy's mission is to improve the quality of life of people facing disadvantages, contribute to healthy ecosystems, and build resilient, inclusive, and prosperous communities by strengthening locally rooted organisations that deliver scalable solutions across health, education, and the environment. SIRA weaves together funders, implementers, and governments into a collective to strengthen India's public childcare system.

My background:

I started out as a mechanical engineer before pivoting into social impact consulting, spending six years designing education and governance programs across India, Southeast Asia, and Europe. At Dalberg Advisors, I worked with partners like Google, NSDC, and state governments to build ed-tech pilots and public systems reform at scale. Earlier, at Samagra, I helped the Government of Uttar Pradesh redesign its foundational literacy program for 12 million students.

I joined the LGT Impact Fellowship because...

...I wanted to move from advising on impact to building it — and SIRA offered a chance to shape a new consortium from the ground up.

In my Fellowship role I will...

... Help take SIRA from 1 to 10 — building a consortium of funders and implementers, setting up governance and MOUs with state governments, and helping early childhood pilots move from design to delivery on the ground.

I am very excited about...

... Building something from the ground up
